

Marjorie PRICE Baker

Speaker, Author & Holistic Nurse

What Others Are Saying About Marjorie . . .

“Attending Marjorie’s seminar was a very powerful experience.”

Janet Englert
Executive Director Senior Health
Alliance of Greater Rochester

“Her presentation style is thoroughly enjoyable... the knowledge she shares is highly effective and immediately usable by health care practitioners of every type.”

Chris Kulp
Executive Director Genessee
Valley Nurses Association

“I love the idea of releasing karma... and all the new energy I have gained.”

Diane Gerber

“I have come from illness, disability, depression, rage, pessimism, hopefulness and now health. I am awed by the laws of the universe you shared and the ‘traveling’ you have facilitated.”

Sue Linder

Marjorie Baker Price is a former actress, Level III Reiki Master, psychiatric nurse clinician, certified hypnotherapist, and writer. She has been highly intuitive since childhood. She offers motivational achievement, rebalancing and inner development through imagery, journaling, hands-on healing, hypnosis and focusing processes.

“All healing, growth and success happens from within. It is an honor for me to work with clients. I listen very carefully and with deep respect to what a client says about their dreams, goals, and sense about their lives. I offer to journey with them to find their center. Deep, rapid shifting results. Rebalancing of self and power occurs. Responses transform. A spiritual sense of self and integrity emerges. Dreams become reality.”

Her nationally acclaimed **Centering® CD’s for Self-Healing and Empowerment** and accompanying self-help workbooks allow easy access to deep levels of consciousness, releasing stress and fear, and boosting motivation and insight to successfully create your dreams.

“We live in an accelerated, hugely complex world which seems to demand an impossible-to-carry external focus and endless doing. We are not designed to just do. We are designed to be in states of integrated ease, not fragmented dis-ease. A little focused being profoundly charges our body and deeply releases our mind to access insight and creative direction at core levels. Then we are free to choose and create, and the doing comes easily and successfully follows.”

TOPICS

1 ***Jumpstart Your Motivation for Achieving Goals & Solving Problems***

Motivation is the “make-or-break” key to real success and overcoming all obstacles. It can get buried under major stress, faulty conditioning, and lack of clear vision.

- Learn the simple three-step foolproof approach to jumpstart motivation and “go the distance” to achieving your highest goals
- Identify what really gets in the way of sustaining motivation
- Unleash your full creative capacity to simply and quickly solve problems while continuing to stay centered

2 ***Compassionate Touch Therapy & New Leadership Skills for Nurses***

Florence Nightingale founded nursing as a spiritually-based vision of practice. Nurses suffer from rampant burnout, impossible job expectations and corresponding lack of self-care; which in turn adversely affects the quality of care given to patients and critical leadership initiatives. This original and multifaceted program focuses on unique, holistic self-care practices for centering and empowerment that powerfully and creatively support:

- Burnout prevention and teambuilding at a grassroots level
- Fundamental wellness practices to support self-help, healing and extended initiative for proven personal and professional transformation
- Inspiring and producing individual and organizational leadership within the basic vision of nursing practice that practically succeeds through all levels of function

3 ***How to Integrate Energetic Healing to Center & Balance Your Life***

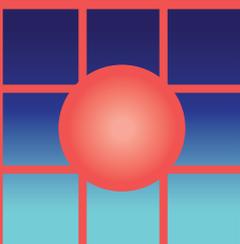

Energetic healing has become an increasingly popular holistic practice to relax, center and improve overall function through techniques like Reiki and Therapeutic Touch. It aligns detached, present, giving intent with simply positioning the hands to transmit what has been called, since ancient times, universal life force energy, translated as *chi, ki, great spirit* and *prana*. This simple and powerful “hands-on” presentation will allow you to easily and extensively transmit healing energy to your body, mind and spirit to:

- profoundly experience fundamental physical, emotional and mental balance
- dramatically open intuition and your own unique connection to your core being
- quickly center and empower yourself to build motivation, unleash creativity, and restore wellbeing throughout your sense of self to then best and most freely respond in all aspects of your life

4 ***Non-Pharmacological Approaches to Relieve Pain & Anxiety***

More and more evidence is surfacing that reports the pervasive and overwhelming effects of pain and anxiety. Prescribing medication has potential side effects, is costly and can be abused with devastating effects. There are easy, simple holistic self-care practices, though, that can significantly relieve the suffering, and terribly compromising effects to wellbeing. Learn how to:

- achieve deep relaxation and release through the three simple, foolproof steps to meditate and visualize ease rather than *dis-eases*, which boosts your immunological system and profoundly recharges body, mind and spirit
- experience key insight, detachment and wellbeing through notetaking, an original and acclaimed journaling and imagery practice that balances and restores easy resolution and higher direction for self-healing and recovery
- perform simple hands-on healing to profoundly destress and remove key related factors that produce pain and anxiety
